

School Improvement Plan

Priorities 24/25

What are we doing....

We hope the impact will be...

Writing

P6 are starting the QI Approach to Writing Initiative while others classes are adopting the principles behind this.
Additional support for small groups to boost attainment.
Refreshing of our whole school writing progression.
Engagement in Moderation Projects with other schools.
Engagement in Guided Approach to Pedagogical Enquiry.

This will help learners to apply their writing skills in a range of different contexts and when writing for different purposes.

It will ensure that we are building on learners' prior experiences and understanding of writing.

Numeracy

Refreshing of our teaching resources.
Additional support for small groups to boost attainment.
Engagement in Moderation Projects with other schools.
Engagement in Guided Approach to Pedagogical Enquiry.

This will help learners to apply their number skills in a range of contexts, including real life application of skills.

It will ensure that we are building on learners' prior experiences and understanding of number processes.

Learning Across the Curriculum

Develop planning progressions in identified areas of the curriculum:
RSHP, PE, STEM, Outdoor Learning/Eco Schools

This will help learners to apply their skills confidently within these subject areas while also ensuring that we are always building on prior learning and understanding.

Establish Learning Centre Provision

Pupils in Learning Centre will make good progression against their individual targets.

Maintenance...

We are continuing to work towards our Silver Accreditation as a Nurturing School and our Rights Respecting School Gold Award.
We will maintain our Gold Award status in Sport Scotland and our high profile of STEM provision and partnerships.
